

Folio demo guide

A 20 minute walkthrough for leadership, in three parts: a new hire, a contributor and an administrator. Tick each box as you go.

The message. Folio is the firm's wiki: one place to find how we work, searchable, linked and kept current. It explains the work and **points to the systems we already use**. It does not replace them, and it does not hold contracts or issued documents. Anyone can read and comment. A few people write. Folio shows who has read what.

Before you start

- Open Folio. Click your initials, then **Settings**, then the **Advanced** tab.
- Under **Vault setup**, beside **Demo**, click **Start**. It takes a few seconds.
- Folio opens the sample vault as **Ellen Ward**, a new hire in her second week.
- Your own vault is not touched. Nothing you do in the demo reaches it.

The purple bar

DEMO Ellen · User Dana · Contributor Jayson · Administrator

- **Click a name** to become that person. Folio reopens as them.
- **Guide** opens this sheet. **Reset** starts the demo over.
- **Exit demo**, or closing the window, puts your own Folio back.
- The demo's calendar is **Monday 5 October 2026**, whatever today is.

1

Ellen Ward, User: a new hire finds her way

about 9 minutes

	DO	SAY	THEY SEE
☐	1 Stay on Home . Point at the search box, the doors, What's new and the Onboarding meter.	<i>Ellen started last Monday. This is the first screen every morning.</i>	Doors to Continue, Browse, Saved, What's new and How it works. Onboarding shows one to catch up.
☐	2 Press Ctrl K and type expenses .	<i>One search covers the whole firm: company pages and team pages together.</i>	Results grouped by page, with the matching lines highlighted.
☐	3 Open Travel and Expenses . Scroll through the steps, the warning, the table and the project code box.	<i>Written the same way every time: when to use it, the steps, the rules.</i>	Numbered steps, a warning callout, a table, a code box.
☐	4 Click expense portal in step 4. Close the new tab.	<i>Folio points to the real system. It does not replace it.</i>	A new tab opens (a sample address, example.com).
☐	5 On Describing a claim , click Copy on the box.	<i>Standard wording, one click, no retyping.</i>	The text is on the clipboard, ready to paste.
☐	6 Click Comments (the speech bubble, top right of the page).	<i>Ellen asked a question last week, and Finance answered it on the page.</i>	Ellen's question and Marcus's reply, pinned to the table section.
☐	7 Point at the Project codes heading and click its comment icon. Choose Question , type <i>Which task code is a conference?</i> , then Post .	<i>The next new hire gets the answer too. Email helps one person once.</i>	The question appears under the section. Dana will answer it later.

☐ 8	Click Who to Ask (in the last section, or under Company). Click the org chart to zoom.	<i>Pages link to each other. That is what makes it a wiki, not a folder.</i>	Picture beside the text, a table of who answers what. An Onboarding banner at the top.
☐ 9	Open Company , then New Hire First Week . Point at the Catch up banner. Scroll to the end.	<i>Onboarding paces itself over six months. Read to the end and wait: it cannot be clicked through.</i>	The banner says "Read to the end", then counts down 15 seconds (longer on a real vault).
☐ 10	Click Mark as read .	<i>Folio records the date and how long she spent on the page.</i>	"Read, 5 Oct, 20 s on this page", with Undo.
☐ 11	Open Our Project Lifecycle . Click Submittal Review under phase 3.	<i>The company page leads straight into the team's own process.</i>	A full width picture, then the Submittal Review process page.
☐ 12	Click Save (the bookmark) in the page bar. Go Home , open Saved .	<i>Your own short list, on any computer.</i>	Submittal Review in Saved.
☐ 13	Open What's new . Click Start Here .	<i>Nobody has to announce changes. Folio shows what is new and which section changed.</i>	Intercoms is New. Start Here, Camera Placement and Cable Pathways are Updated, with the sections named.
☐ 14	Click the ? in the header. Open Using Folio , then go back.	<i>Help is built in, written for each access level.</i>	The amber help bar and the guide cards.

2 Dana Whitfield, Contributor: keeping it right

about 5 minutes

DO	SAY	THEY SEE
☐ 1 In the purple bar, click Dana Whitfield .	<i>Dana writes and reviews pages for her group. Same app, more buttons.</i>	New page in the header and an Admin door on Home.
☐ 2 Open Admin , then Review .	<i>Every page is reviewed. This is the queue, oldest first.</i>	Pages waiting: to be reviewed, flagged and with questions.
☐ 3 Click Review page on Camera Placement , look at what changed, then Approve .	<i>You see exactly what changed since it was last approved.</i>	The new Worked example section marked, then the page leaves the queue.
☐ 4 Open All comments . Find Ellen's question on Travel and Expenses , Reply : Use <i>TRN</i> , then Mark closed .	<i>Every open question in the vault, in one list. Nothing gets lost.</i>	The reply under Ellen's question; the comment folds to one line.
☐ 5 Open Templates . Click Process , then Outline and AI prompts .	<i>Every page type has a shape, so pages read the same across the firm.</i>	A sample Process page, its sections, and ready-made prompts for writers.
☐ 6 Click New page . Pick Guide , type a title. Point at the number and the folder. Click Cancel .	<i>New pages start from a template and wait in Drafts until reviewed. Writing happens in Obsidian, which we show separately.</i>	The template's sections, the next free number, and where it will be filed.

3 Jayson Stickrod, Administrator: knowing it works

about 6 minutes

DO	SAY	THEY SEE
☐ 1 In the purple bar, click Jayson Stickrod . Open Admin , then Users .	<i>Who owes what, at a glance. Red is overdue, yellow is owed.</i>	Seven people. Ellen is new staff, day 6, in her two-week cushion.
☐ 2 Click Ellen Ward 's row to open it.	<i>New staff are not buried: must reads wait until her two-week cushion ends. And here is what she read earlier, with the time she spent.</i>	Must reads marked Held until 12 Oct; her onboarding list with New Hire First Week read.
☐ 3 Click New must read . Pick a page, choose All , look at the priority slider. Click Cancel .	<i>A new policy? Assign it to everyone with a due date, and see who has read it.</i>	Page, people, Critical to Casual, and the due date it sets.
☐ 4 Open Usage . Then the Searches tab.	<i>Which pages earn their place, and what people searched for and did not find. That is the list of pages to write next.</i>	Most read pages, pages never opened, searches with no results.
☐ 5 Open Vault check .	<i>Folio checks its own health: pages nothing links to, overlapping pages, broken links.</i>	A short list of findings, each with a fix or Dismiss.
☐ 6 Open Staff update . Click Copy for email .	<i>The weekly note about what changed writes itself.</i>	Must reads, new pages and updates, ticked and ready to paste into an email.
☐ 7 Optional: open any page, More , then Edit . Change a word and save.	<i>Small fixes can be made right here. The change goes to Review like any other.</i>	The page updates; Review gains a row.

✓ Close

- ☐ One place to find how we work. Searchable, linked and kept current, with review built in. It points to our systems instead of replacing them, and it shows who has read what.
- ☐ Writing pages in Obsidian is a separate demo.
- ☐ Click **Reset** to run it again, or **Exit demo** to go back to your own vault.

If something looks wrong mid-demo, click **Reset**. It starts over from the beginning in a few seconds. Sample names and links are made up; links go to example.com.
